Though not illustrated explicitly in this picture, Details, Notes, and Find are mutually exclusive checkable items and one must always be checked

Full Screen and Minimize are also mutually exclusive but they do not need to be checked. When neither are checked the program should be in windowed mode.

For the Help and About us... I just want a simple window to pop up with very basic information.

Note that the colors are for illustration purposes only. . .we will be using standard looking menus.

I expect that we will be able to do all the black features but only a few (if any) of the blue ones. Any features we are not able to incorporate can be disabled in the menu.

The gray items in the edit menu are a standard feature and should be enabled when the user is editing but otherwise should be disabled as illustrated here.

We will also want to include mnemonics (keyboard shortcuts) for many of these items.
